

JAGDISH PANDEY

Cloud Computing & Full-Stack Development | Computer Engineering Graduate

Kathmandu, Bagmati, Nepal | 9865683309 | jagdishpandey4444@gmail.com

Portfolio: pandeyjagadish.com.np | GitHub: jaggasingh4444

PROFESSIONAL SUMMARY

Computer Engineering graduate seeking opportunities in cloud computing and full-stack web development. Hands-on exposure to AWS deployment workflows, Linux, GitHub, MERN stack, and technical troubleshooting. Able to build scalable, user-friendly applications and support organizational IT operations with clear documentation, accurate data handling, and continuous learning.

CORE TECHNICAL SKILLS

Cloud & Hosting	AWS EC2, Amplify, Elastic Beanstalk, S3 basics, IAM basics, Route 53/DNS, custom domain setup
DevOps & Tools	Linux terminal, Git, GitHub, Nginx basics, CI/CD concepts, environment variables, deployment troubleshooting
Full Stack	React.js, Node.js, Express.js, REST APIs, HTML, CSS, JavaScript, PHP basics
Database	MongoDB, MySQL, SQL Server, database and system knowledge
Office & IT	Microsoft Word, Excel, PowerPoint, Google Drive, Gmail, file management, software installation, e-Governance support
Security	Basic cybersecurity awareness, networking basics, safe online practices

WORK EXPERIENCE

Computer Operator / IT Support | Federal Parliament Secretariat, Kathmandu

May 2026 - Present

- Manage digital documentation, official report formatting, data entry, and website content updates.
- Support document conversion, file accuracy checking, digital communication, and technical troubleshooting.

Civil Sub-Engineer | Water Resources and Irrigation Development Office, Dadeldhura, Sudurpashchim, Nepal

Apr 2018 - Jul 2020

- Prepared cost estimates and quantity take-offs; developed and interpreted technical drawings and basic design plans.
- Conducted site visits, monitored quality standards, performed leveling/surveying, and coordinated project delivery.

SELECTED PROJECTS

MERN Social Media Application Deployment on AWS

2026

AWS Amplify, Elastic Beanstalk, API Gateway, MongoDB, React, Node.js, Express.js

- Deployed React frontend using AWS Amplify and hosted Node.js/Express backend using AWS Elastic Beanstalk.
- Configured production API endpoint, environment variables, CORS, authentication flow, and deployment troubleshooting.

Teacher Lesson Plan and Feedback System | National Academy of Science and Technology

Aug 2025 - Nov

2025

Project Developer | Web and Android application

- Developed a full-stack lesson plan and feedback system using HTML, CSS, JavaScript, PHP, MySQL, Java, and Firebase; supported lesson management, admin feedback monitoring, and anonymous student feedback.

Pharmacy Management System | National Academy of Science and Technology

Jul 2023 - Oct

2023

Project Developer | C# and SQL Server

- Developed a desktop pharmacy management application for medicine inventory, billing, sales records, stock tracking, and invoice generation.

Portfolio Website Hosting

2026

AWS Amplify, Route 53, GitHub, Custom Domain

- Hosted personal portfolio website, configured custom domain/DNS validation, and connected GitHub repository for automatic deployment.

EDUCATION

Bachelor of Computer Engineering | National Academy of Science and Technology, Pokhara University

Mar 2021 - Feb

2026

Diploma in Civil Engineering / Overseer | Mahendra Secondary School

Aug 2016 - Aug

2019

Civil Sub-Overseer, T-SLC | Mahendra Secondary School

May 2015 - Apr

2016

LANGUAGES & STRENGTHS

- Nepali - Native / Fluent; English - Working proficiency.
- Good foundation in computer operation, internet and online tools, file management, software installation, and office documentation.
- Career target: Entry-level Cloud Engineer, Cloud Support Associate, DevOps Intern, IT Support Engineer, or Full-Stack Developer role.
